

# PADI Advanced Open Water

## New Zealand Sea Adventures

*Recreational, Professional and Technical Diver Training*

### ***“Your Next Step in Underwater Adventure”***

Exploration, excitement and experiences are what the PADI Advanced Open Water course is all about. And no, you don't have to be "advanced" to take it - it's designed so both new and experienced Open Water Divers can sign up and develop better diving skills and techniques straight away!

The Advanced Open Water Diver course helps you increase your confidence and build scuba skills to become safer and more comfortable in the water. It's also a great way to get more diving experience under the supervision of a PADI Instructor.

This course builds on what you've learnt and develops new capabilities by introducing new dive activities and ways to have fun scuba diving. You will complete 5 different types of dives to build your confidence and develop your dive skills. The dives include the basics of *Deep Diving*, *Underwater Navigation* - and your choice of *Peak Performance Buoyancy*, *Naturalist*, *Fish Identification*, *Wreck (weather dependant)*, *Enriched Air \**, *Photography* or *Night during winter*.

Complete the theory online, then join us for a weekends diving. After the 5 dives over the weekend you will qualify as a PADI Advanced Open Water Diver. This is the minimum requirement for many of our dive adventures and a prerequisite for the PADI Rescue Diver course.

If you have any questions please call so we can help you.

Kind regards,

*Tony Howell*
